## Objective

Passionate developer skilled in Android, Web, and Python development. Experienced in building real-time Android apps, responsive web designs, and backend automation. Currently expanding into Data Science and AI/ML with practical knowledge of NumPy and Pandas. Seeking opportunities to apply full-stack and data-driven development skills in innovative projects.

## Education

B. Tech CSE | Delhi Technical Campus (GGSIPU), Greater Noida | Expected 2027

Diploma in ECE | DSEU Ambedkar Shakarpur Campus I, Delhi | 2024

## Skills

- Android Development: Kotlin, Jetpack Compose, Java, Firebase, REST APIs
- Web Development: HTML, CSS, Bootstrap, Tailwind CSS, JavaScript
- Python & Backend: Flask, SQLite, Web Scraping, REST API Integration
- Data Science: Python, NumPy, Pandas (Learning)
- Tools: Git, GitHub, Android Studio, VS Code, Postman, Linux (Ubuntu, Arch)
- Soft Skills: Problem Solving, Teamwork, Continuous Learning

## Projects

### Job Ease – Job Aggregator & Automation App

Developed a Python-based web app that scrapes listings from Indeed and Naukri, stores them in SQLite, and sends daily email updates for Android, Web, and Python jobs.

*Tech Stack:* Python, Flask, BeautifulSoup, SQLite, APScheduler, SMTP

### SOS Emergency Assistance App

Created an Android app that sends real-time SOS alerts with live location and emergency details. *Tech Stack:* Kotlin, Firebase, Jetpack Compose, Location API

### Real-time Chat App

Built a chat application using Kotlin and Jetpack Compose with a Ktor backend for real-time messaging via sockets. *Tech Stack:* Kotlin, Jetpack Compose, Ktor (Sockets), Android Studio
